Work Experience

Bestow Life Insurance September 2021 - April 2023

Software Engineer II

Austin, Texas

- Implemented and maintained a rules engine in Python that enables faster decisions on customer product eligibility.
- Expanded monitoring infrastructure across multiple development environments, which improved error visibility and handling through Terraform and Slack Integration
- Configured Insurance Carrier-Product Microservice in Golang from scratch with gRPC endpoints, and established new Pricing services in Python for new insurance products that expanded eligibility to over 100k Nationwide and Equitable customers.
- Integrated Kubernetes clusters to the development environment enabling efficient resource usage consumption, consistent productivity, and production-ready contributions.

American Express January 2021 - September 2021

Software Engineer III

Phoenix, Arizona

- Expanded GraphQL endpoint consumer options with Java to enable greater risk credit card data management.
- Improved codebase security by integrating a secrets vault system using OpenShift.
- Maintained and improved data traffic monitoring for stronger analytics by versioning our Java REST APIs

Google Developer Student Club February 2020 - December 2020

Founder

San Marcos, Texas

- Lead students at Texas State University to use Google technologies like Android, Firebase, and TensorFlow to solve problems for local businesses

Austin Community College August 2017 - Present

Mathematics Tutor IV

Austin, Texas

- Brought all students to proficiency by simplifying mathematical concepts and coaching critical thinking.

Projects

Developer Portfolio

galbeyte.com

- Built with React & Next.js (App Router & Server Actions), Typescript, TailwindCSS, Framer Motion, React Email & Resend, Vercel Hosting.

Pet Adoption App

github.com/Galbeyte1/Adopt-Me

- A React adoption frontend app consuming an API with a variety of animals and breeds at various locations. Refactoring to full-stack using Typescript and a customized Golang Microservice API

Rocket gRPC Microservice

github.com/Galbeyte1/gRPC-microservice

- Built a well-tested production-ready gRPC Rocket Inventory Microservice that interacts with a Postgres database.

Education

Texas State University December 2020

BS Computer Science and Mathematics

San Marcos, Texas

- Courses: OOP, Data Structures, Fundamentals of Algorithms and Analysis, Computer Networks, Computer Architecture, Operating Systems, Software Engineering, Internet Software Development, Statistics, Machine Learning, Computer Systems Security

Skills

Frontend Javascript, CSS, HTML, Reactjs, Nextjs, TailwindCSS

Backend Java, Springboot, Python, Flask, Go, Fiber, GORM, Nodejs, GraphQL, gRPC, REST APIs, Postgres

DevOps Docker, Kubernetes, Google Cloud Platform, Vercel, Terraform

Tools VSCode, JetBrains, Postman, Postico
